

WHAT YOU SEE IS
WHAT YOU GET

WHAT YOU PAY FOR IT IS
WHERE WE COME IN

Making
healthcare
affordable,
ONE PURCHASE
AT A TIME

SUPPLYCOPIA

When your supply chain hands you lemons, LET SUPPLYCOPIA HELP YOU MAKE LEMONADE

1 A Data/Item Master with all you need, when you need it.

Drawing on open.fda.org, **manufacturers and distributors'** catalogs and more than 200 sources on the web, we extract, clean, classify, code, catalog, and enhance more than 3.5 million SKUs of global suppliers for med surg, consumables, and equipment. We let you standardize products and procedures, **optimize inventory management**, and redesign your preference cards, all on an affordable cloud-based solution.

Thousands of machine learning and AI algorithms help you identify **functionally equivalent products** so that your physician preference items and procedure and product standardization is **driven by evidence-based decision making**.

Our data is updated daily, maintaining relevancy and freshness in every product offering- Whether you leverage the data for order management, value, and inventory analysis or for standardization, you will never have to hire consulting companies again. **This solution integrates with every ERP system or can be used as a stand-alone tool.**

3 Signals Matter. Our Data Analytics finds them

Integrated analytics- Whether you are analyzing spend for med surg, consumables or equipment or purchased services, our **machine learning algorithms identify opportunities in price, demand, compliance, process and specification** in each product category.

More than **110 levers** are automatically activated when anomalies are detected, converting the information into actionable intelligence

Understanding procedure costs, comparing and contrasting them via machine learning, and building automated models for product and procedure standardization requires data scientists and skills to build hundreds of models. We have **successfully deployed this model to more than 100 hospitals in 10 different countries** addressing thousands of procedures. We can guide your decision making and cost savings in as little as 4-6 weeks.

2 A Platform built for every hospital and procedure

Whether you are looking to automate your P2P processes or exploring an Amazon-like electronic catalog functionality as an add-on to your current ERP system, **you can leverage the SupplyCopia platform** to easily and quickly achieve your objectives.

Whether your objective is an internal transformation or creating a new age GPO, IDN, or private marketplace, the cloud-based platform **digitizes all processes between providers and suppliers.**

Built-in tools like hospital database, global supplier database, RFP, PriceCheck, price, and promotions make your supply chain dynamic in nature with **minimum investments and time.**

4 Savings opportunities in plain sight

Our visualization layer brings everything together in one easy-to-follow dashboard and reporting tool.

To see for yourself what **SupplyCopia** can do for you, please contact info@supplycopia.com.
